- PhD, UofG 2022 - Cleaning the loop. Driving consumer clothing circularity
- Postdoctoral research – CCD, UAL
- Creative entrepreneur – Creative Informatics – Circular Materials Repository

In 1765, Glasgow, Scotland, James Watt invented new mechanisms for the steam engine accelerating the industrial revolution. As a citizen of Scotland, it is my duty to work towards reversing the industrial system that Watt inadvertently enabled and change the current linear system to a circular neo-animist citizen culture.
